

## CSI Pollen Netherlands – Focus on citizen scientist

**Name:** Anton Van Derbeken

**Region:** West-Vlaanderen, Belgium

I participate in the C.S.I. pollen project because in my opinion the importance of pollen availability, especially in autumn, is still underexposed. For me it is clear that a constant diverse pollen- and nectar flow attribute to healthy, good functioning honeybee colonies. I do pollen identification for myself and colleague beekeepers and participating in C.S.I. pollen is a good addition to what I am doing. Besides that, participating in C.S.I. Pollen gives me a better insight of the pollen diversity my bees can forage on.
